SEEDED

Cath Tate Cards has gone wild for wildflowers!

All the cards in our new SEEDED range of cards are plantable and will grow into bee-friendly wildflowers!

The paper is hand made in the UK and is embedded with bee-friendly, UK native, non-GM wildflower seeds.The flowers in the seed mix are beautifully hand painted on the front of the cards by artist and gardener Charlotte Day, who previously worked for the Royal Horticultural Society.

Soak paper overnight before planting in soil.

Place in a sunny spot and water regularly. They need to be kept very moist.

Watch your beautiful wildflowers grow.

The months of March/April or August/September are best for growing. For best results store in a cool dry place and plant within 12 months. After two years germination rates start to drop.

Flowers in the seed mix include:
Birdsfoot Trefoil, Black Knapweed, Black Medick, Meadow Buttercup, Musk Mallow, Ox-Eye Dais, Ribwort Plantain, Red Campion, Salad Burnet, Self Heal, White Campion, Yarrow.
